Back-end Developer

Back-End Developer specialized in Node.js and NestJS, with experience designing distributed architectures and APIs with complex analytics and LLM integration. I've worked with PostgreSQL, Redis, Docker, and AI models for real-time data processing, as well as implementing robust payment gateways, async scraping pipelines with HTTP/2, multiprocessing, and browser automation with anti-detection. I complement my profile with advanced Python (async scraping, schedulers, daemons) and modern frontend foundations, enabling effective collaboration in fullstack teams. I stand out for my tech curiosity, constant learning, and quick adaptation to new tools. Looking to contribute to challenging projects with real impact.

SKILLS

Programming Languages & Frameworks: Node.js, TypeScript, JavaScript, NestJS, Python

Databases: PostgreSQL, MySQL, SQLserver, Redis

Tools & Technologies: Docker, Linux, Git, GitHub

Languages: Spanish (native), English (B1)

WORK EXPERIENCE

Municipalidad de la Capital de San Juan

Back-End Developer

08/2025 - Present

San Juan, Argentina

- Distributed architectures with NestJS + Python, fully containerized with Docker
- APIs REST con análisis complejo, estrategias híbridas SQL + LLM y caché inteligente REST APIs with complex analytics, hybrid SQL + LLM strategies, and smart caching
- Async data pipelines with HTTP/2, multiprocessing, Redis, and continuous processing daemons
- Social media scraping with browser automation, anti-detection patterns, and extensible per-platform architecture

Solo en Preventa

Back-End Developer

12/2024 - 06/2025

Monterrey, Nuevo León, México

- Development and maintenance of backend services for the e-commerce platform
- Database design, achieving a scalable and high-performance architecture
- RESTful API implementation
- Query and critical process optimization, improving response times

EDUCATION

Degree in Computer Science

Universidad Nacional de San Juan • GPA: 9.5/10

03/2025 - 12/2029

PROJECTS

CotizaX

01/2026 - Present

SaaS designed for freelancers and small businesses to create, send, and manage professional quotes.

LockBox

01/2025 - 02/2025

File storage system with version control on Google Cloud Storage.

Ticket Flow

12/2024 - 12/2024

Event management and digital tickets with unique QR codes and payment integration (Mercado Pago).
